## Inventory of Digitized Pantographic Images

### Quality and Resolution Vary

If you want one of these photographs in reproducible quality, please come to or contact the museum so that we can check on it and see the best way to send it to you. We will not wholesale send a copy of all are holdings without a really, really, really big donation. Hundreds of hours were taken and a lot of money was spent to accumulate and document this collection. If you have another to add to the collection, we do not need the original. We would like the highest possible scan. In JPEG, a typical “yard long” takes 25-35 MEG with a Vugraph Wand scanner.
